

Constables' Conversion

Like all Constables' wheelchair accessible vehicles, our Peugeot Expert conversions are designed and manufactured at our purpose built UK production facilities. This means we can offer a choice of several configurations, so you're sure to find the one that's right for you and is tailor made for the type of journeys you make. We'd be happy to demonstrate one to you and discuss all the choices available - we're confident you'll find one that's just right for all your needs!

Real choice - exactly what you need

Constables' Expert is an MPV designed for travelling in comfort and available in a choice of three different configurations. Each option is available as either a short or a long wheel-base version, which enables us to offer you a variety of seating arrangements and the ability to carry up to two wheelchairs. Complemented by a choice of engines, a variety of options, and two different levels of trim, Constables' Peugeot Expert is the perfect choice for families and those who travel for pleasure.

Thoughtful engineering - designed for space

Constables' approach to engineering their latest Expert MPV conversions was based on looking for the flexibility and range of options requested by different customers.

Resulting in the following different configurations designed to meet their wide range of needs and requests:

- The basic configuration offers up to seven seats (including the driver and wheelchair);
- The full-length floor conversion brings the wheelchair user into the heart of the car, seated alongside family and friends, whilst still offering up to six seats (including the driver and wheelchair). This is the most spacious conversion and is particularly suitable for larger wheelchair users, offering the full length floor conversion with extra headroom.

Enjoy the journey - travel in comfort

Everything in Constables' popular Expert Tepee has been designed considering the needs of the driver, wheelchair user and passengers alike. Every occupant enjoys excellent visibility, particularly with the eyeline engineered into Constables' conversions with their fully lowered floors; with the wheelchair user in the heart of the vehicle there is plenty of space for luggage, equipment or other bulky items. In addition, Constables' conversions capitalise upon the ergonomics of the Expert Tepee, offering a wide variety of seating options to ensure comfort, stability and flexibility.

The Peugeot Expert

Enjoyable driving - maximum efficiency

Constables' Expert conversions are available with a choice of two HDi diesel engines, both equipped with a common rail direct injection system, which reduces fuel consumption and produces additional power whilst conforming to Euro 4 anti-pollution standards.

Reliable, efficient safety

Reliable, efficient safety is the least you should expect, which is one of the reasons why Constables have included the Expert within their range of conversions. For example, the Expert Tepee incorporates ABS (anti-lock braking system) and EBS (emergency brake assist) as standard on all models, as well as a driver's air bag, height-adjustable 3-point front seat belts and rear seats with curved head rests.
